Magna V6 Executive Wagon

MAGNA WAGON

THE SYNERGY OF FORM AND FUNCTION

Sit behind the wheel of a Magna Wagon and you'll come face to face with our very first design consideration. You. Every feature in the Magna Wagon has been designed with you in mind. We call it human orientated engineering. You'll simply call it comfort.

We've given you a Wagon with the features and safety standards you'd normally expect in much more expensive European marques. And one that succeeds in meeting Australian drivers' requirements for handling, space and performance.

The TS Magna Wagon SE and Executive models are powered by a responsive 2.6 litre multi-point fuel injected 4 cylinder engine. Whilst all 2.6 Magna Wagons offer the choice of a 5-speed manual or 4-speed automatic transmission, the 4 cylinder engines feature electronic ignition and Mitsubishi's patented 'Balance Shaft' vibration neutralising technology.

The SE V6 and Executive V6 are equipped with a 3.0 litre multi-point fuel injected engine, producing 120kW of power at 5500rpm and 235Nm of torque at only 4000rpm.

The SE V6 is equipped with a 4-speed automatic transmission including power and economy modes which is a real asset when it comes to towing and flattening out steep hills. For the Magna Executive, the 5-speed manual is standard and the auto is optional.

The 5-speed manual gearbox features distinct gear lever positions whilst the 4-speed automatic has a lock-up clutch which provides a solid link between engine and gearbox, making optimum use of the engine's power and torque to give lively response and effortless, smooth cruising.

The rack and pinion power-assisted steering gives a positive feel for the road and, combined with the fully independent front suspension, provides excellent directional stability with an almost total absence of roll in cornering.

Motoring experts both in Australia and overseas praise Magna's handling as being outstandingly safe and predictable and are astonished that they are actually driving a wagon. An opinion assisted no doubt, by the fact that there's no drumming noise coming from the rear cargo area, something most wagons are notorious for. Thanks to Magna Wagon's 5-link rear suspension and its silencing counter-measures, the noise level is rated just above the average conversation of 65.7 decibels at 100km/h. The emphasis on safety is reinforced with the availability of Magna's ABS

2.6 litre
SOHC
4 cylinder
engine

anti-lock brakes and SRS drivers side airbag on 6 cylinder models.

To maintain a smooth and uncluttered aerodynamic efficiency, the semi-concealed windscreen wipers, rear air deflector and concealed side drip channelling are fully integrated into the Magna Wagon's fluid form.

Magna's legendary smoothness, quietness, effortless performance and its predictable reaction to the driver's touch are the components of the human-orientated technology that makes this car such a pleasure to drive.

Quality trim and carpets and deeply padded seating for five, extend through the vehicle's cargo carrying interior. There is a 60/40 split fold rear seat for added versatility when balancing passenger and

luggage needs. With the option of 882 litres of space when the rear seats are up to a huge 1524 litres of carrying space when they are fully reclined.

The rear cargo floor is low and broad without being impeded by suspension towers, thanks to the uniquely Australian designed five-link rear suspension. The optional cargo net and barrier may be installed behind either the front or rear seats giving passengers added safety.

Inside and out, Magna Wagon possesses special refinements of thoughtfulness and convenience which distinguish it from the average. The wide, one-piece tailgate is top-hinged and recessed into the bumper. It opens high on gas struts to allow easy access to the interior with minimal effort in lifting and loading cargo.

Other innovative features include the retractable security blind found in both Executive and SE

model Wagons and the integrated air deflector which, with the washer/wiper and demister, assists in keeping rear vision clear. The large glass area is moderately raked to cut down internal reflection and to avoid compromising the luggage capacity.

Therefore, whether you're lugging goods to a valued customer, loaded to the hilt with the kids and the dog for a family holiday, or going out to dinner in style, Magna Wagon is never out of place.

A range of options and accessories is available from your Mitsubishi Dealer, providing further convenience, comfort and protection for your investment.

Genuine Mitsubishi air conditioning features the environmentally friendly refrigerant gas R134A and is manufactured to deliver maximum

performance without overloading the engine or cooling system. Standard on SE model Magna, it can also be fitted to the Executive models by your Mitsubishi Dealer.

Only genuine Mitsubishi accessories are approved and warranted for Magna by Mitsubishi Motors Australia.
